PROFILE

Backend software engineer passionate about QA Engineering, currently preparing the ISTQB Foundation Level certification. My development background helps me understand the code and target relevant manual and automated tests (Selenium, Playwright, Postman, JUnit) in Agile teams.

PROFESSIONAL EXPERIENCE

Specialization – Quality Assurance Engineer & Software Tester

Jun 2026 – Present

Independent Training

Antibes, France

- Preparing for the ISTQB Foundation Level certification
- Wrote and executed manual test cases, tracked defects with Jira
- Test automation with Selenium, Playwright, Postman and JUnit on personal projects
- Applying Agile methodologies (Scrum, Kanban) and software quality best practices

Full-time – Java Backend Engineer – Microservices

Nov 2025 – Mar 2026

Polydron Labs | Java 17, Spring Boot, Docker, CI/CD, Git

Paris, France

- Developed microservices with Spring Boot in a distributed environment
- Optimized REST API performance and improved service resilience
- Contributed to backend architecture and distributed systems design

Graduation Internship – Java Backend Engineer

Apr 2024 – Dec 2024

Polydron Labs | Java, Spring Boot, PostgreSQL, GitHub Actions, CI/CD, Git

Paris, France

- Built an advanced search module for an ERP system (Spring Boot, REST APIs, PostgreSQL)
- Implemented multi-criteria search filters for more relevant results
- Set up CI/CD pipelines to automate module deployment

Internship – Backend Engineer – Architecture & Microservices

Jun 2023 – Sep 2023

Proxym | Java 17, Spring Boot, Spring Cloud, RabbitMQ, Docker, Git

Sousse, Tunisia

- Migrated a SaaS application from a monolithic to a microservices architecture
- Split the system into independent services with REST APIs (Spring Boot)
- Set up a distributed architecture with Spring Cloud, RabbitMQ and API Gateway
- Collaborated with frontend teams on feature integration

Internship – Backend Engineer – IoT & Event-Driven

May 2022 – Sep 2022

SiteFlow | Java 17, Spring Boot, Apache Kafka, MongoDB, Docker, Git, JUnit, Mockito

Sousse, Tunisia

- Built a Java backend for real-time IoT data processing
- Set up an event-driven architecture with Apache Kafka
- Designed REST APIs with Spring Boot and MongoDB storage
- Containerized services with Docker and wrote unit tests (JUnit, Mockito)

EDUCATION

Higher Institute of Applied Sciences and Technology of Sousse

2021 – 01/2025

Engineering Degree in Software Engineering

Sousse, Tunisia

Higher Institute of Applied Sciences and Technology of Sousse

2019 – 2021

Preparatory Cycle MPCS (Mathematics, Physics, Computer Science)

Sousse, Tunisia

CERTIFICATIONS

ISTQB Foundation Level | ISTQB

In progress

TECHNICAL SKILLS

Testing & QA: Manual & automated testing, Selenium, Playwright, Postman, JUnit, Mockito, Jira, API testing

Languages & Frameworks: Java (8/17/21), Spring Boot, JavaScript

Methodologies & Tools: Agile (Scrum, Kanban), Git, Docker, GitHub Actions, CI/CD

Databases & Systems: PostgreSQL, MongoDB, MySQL, Linux

LANGUAGES

Arabic (Native) • French (Fluent) • English (Professional)
